For Sprint 5, front-end for the questionnaire and display result is in progress, but not being pushed yet, for its back-end side it is already the questionnaire and display result are completely done and functional. Notifications that will be used in the application are now being developed (to serve as guide for users in the UI side). We are working to finish the front and to be pushed before this week ends.

Sprint Retrospective

What went well:

- The biggest modules are now done, and the blockers are resolved.
- The back-end side of HUEnique questionnaire are done.
- The back-end side of HUEnique display result/seasonal are done.

What could be improved:

- The front-end side of questionnaire and display result are under development, it should be done within this week.
- The notifications should be pushed in the repo within this week too.

What needs to be done:

- Finish the front-end for the main module.
- Profile Page
- Add-ons
